

ANIL KUMAR NAG

+1 (702) 721-5494 anilnag844@gmail.com linkedin.com/in/anilkumarnag Las Vegas, NV (Remote)

PROFESSIONAL SUMMARY

Senior SDET and QE Platform Architect with 12+ years building scalable test automation systems for **healthcare, SaaS, and enterprise platforms**. At Quest Diagnostics, built HIPAA-adjacent automation for lab testing and payment workflows. At MGM Resorts, architected an AI-powered QE platform serving 18 product teams - driving 30-40% efficiency gains through **Playwright, TypeScript, Python, and AWS Bedrock/Claude AI** integration. Expert at **coaching teams on automated testing best practices**, integrating tests into CI/CD pipelines, and delivering **stable releases across multiple SaaS products**. Experienced in REST API testing, backend service validation, and flakiness reduction. Deep healthcare domain knowledge from Quest Diagnostics makes me uniquely positioned for Bluesight's pharmacy intelligence platform.

CORE COMPETENCIES

Healthcare SaaS QA (HIPAA-adjacent)

Multi-Product Automation Coverage

Playwright + TypeScript + Python Testing

CI/CD Test Integration (GitHub Actions)

REST API & Backend Service Testing

Coaching Teams in Automated Testing

Flakiness Reduction & Test Reliability

AI-Assisted Test Generation (Bedrock, Claude)

WORK EXPERIENCE

Wipro Limited (Client: MGM Resorts International)

Apr 2023 - Present

QA Automation Architect / Principal SDET

Las Vegas, NV (Remote)

- **Coached and upskilled 15-20 QE engineers** in automated testing best practices (unit, integration, API, UI levels); established standards, reduced flakiness, and incorporated testing directly into CI/CD workflows (GitHub Actions quality gates).
- Built AI-powered QE platform covering **18 SaaS product teams** (Commerce, Identity, Payment, 15 others) - Playwright v1.52 + TypeScript framework with self-healing tests and multi-environment support (5 environments).
- Integrated **AWS Bedrock + Claude AI** for intelligent test generation; reduced manual test effort by 30-40% across multiple SaaS products and services.
- Built **comprehensive API testing infrastructure**: Axios, REST Assured patterns, GraphQL, JSON Schema validation (Ajv), OAuth 2.0 token management; deployed K6 performance testing across 5 environments.
- **Reduced test flakiness** through self-healing locators, intelligent retry policies, and smart wait strategies; improved test reliability across regression, smoke, and sanity suites.
- Led initiatives to improve test coverage (20% increase) and incorporated testing into CI/CD pipelines with automated Allure/Xray reporting and deployment gates.

Wipro Limited (Client: Quest Diagnostics)

Aug 2018 - Oct 2021

SDET-II - Healthcare Platform Testing

Hyderabad, India

- Built BDD automation framework (Protractor, TypeScript, Cucumber) for **MyQuest & QuestDirect - HIPAA-adjacent healthcare lab and payment platforms**; achieved 90% regression coverage across 500+ test cases.
- Delivered API automation testing for healthcare payment processing and lab result retrieval workflows; maintained GitLab CI/CD pipelines for regulated healthcare application delivery.
- Worked within Agile/Scrum with BDD practices; received **Outstanding Performance Award 2019** for quality leadership excellence.

Wipro Limited (Client: McGraw-Hill - EdTech)

Oct 2021 - Mar 2023

Senior Test Engineer / SDET

Remote

- Architected Playwright + TypeScript E2E framework; reduced regression time 60%; 95% API test coverage for critical eCommerce flows using Postman, Axios, and K6.
- Integrated AI/ML tools into QA workflows; reduced manual test effort by 45% through intelligent test generation.

Syena Infosoft / People Tech IT Consultancy

Jun 2013 - Jul 2018

Test Engineer / Member Technical - Testing

Hyderabad, India

- Built Selenium + Java automation framework (Jenkins CI); 70% reduction in manual regression effort. SQL Server database testing for healthcare and HR management platforms.

KEY PROJECT

Multi-Product QE Platform (18 SaaS Teams) MGM Resorts - Enterprise Healthcare-Adjacent

Designed and built an AI-driven QE platform covering 18 SaaS product lines - each with unique testing requirements across Commerce, Identity, Payment, and data domains. Platform features: AI-generated test cases (Bedrock + Claude), Playwright automation, 5-environment execution, flakiness monitoring, and coverage dashboards. Scaled without per-team customization.

Playwright | TypeScript | Python | AWS Bedrock | Claude AI | GitHub Actions | Allure | Xray | Ajv | K6

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering - Bharath University, Chennai		2012
GitHub Copilot L3	Wipro AI Academy	2025
ISTQB Certified Tester - Foundation Level	ISTQB	-
Outstanding Performance Award	Quest Diagnostics / Wipro	2019
Best Delivery Champion	Wipro	2025

SKILLS

Automation Frameworks: Playwright v1.52+, Selenium, Protractor, Testim, Cucumber BDD	Languages: TypeScript, JavaScript, Python, Java, Node.js
API Testing: REST Assured, Axios, Postman, Newman, K6, GraphQL, Ajv	AI Tools: AWS Bedrock, Claude AI, GitHub Copilot L3, Cline AI, MCP Servers
CI/CD: GitHub Actions, Jenkins, CircleCI, GitLab CI, Bamboo	Healthcare: HIPAA-adjacent testing, lab platforms, payment workflows (Quest)
Databases: PostgreSQL, MongoDB, MySQL, SQL Server	Reporting: Allure, Playwright HTML Reports, Xray, JUnit XML
